

Xtreme-Duty® Agitator

Capable of Mixing High Viscosity Materials for Protective Coatings

PROVEN QUALITY. LEADING TECHNOLOGY.

Graco is your total solution

- Helps maintain proper material consistency
- Easily mounts on 55-gallon (200 liters) drums
- Blades are sized to allow a transfer pump inside the drum

Ordering Information

| | |
|--------|---|
| 25A598 | Bare agitator |
| 25A599 | Agitator on drum cover with handles |
| 25A600 | Agitator on drum cover with elevator |
| 25A601 | Agitator on drum cover with elevator and feed pump (5:1 CS Monark) |
| 25A602 | Agitator on drum cover with elevator and feed pump (5:1 SST Monark) |
| 25A603 | Agitator on drum cover with elevator and feed pump (10:1 CS President) |
| 25A604 | Agitator on drum cover with elevator and feed pump (10:1 SST President) |
| 17J004 | Blade set. For use as spare or extra mixing. |
| 217374 | Gear oil (change after first 100 hrs of break-in period) |

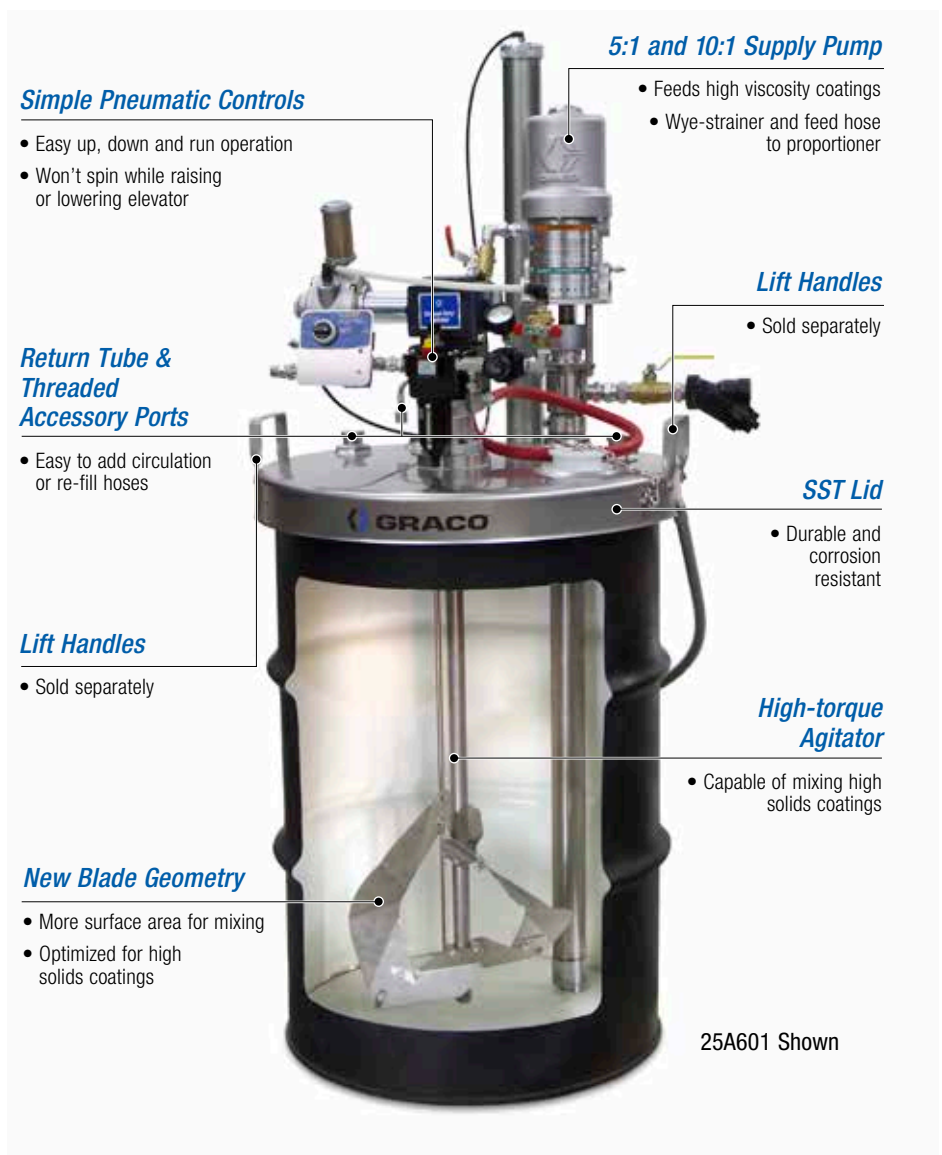

Proper mixing is step one

If material is not properly mixed, it will never reach optimal performance conditions despite the highest quality of pump, sprayer, and spray gun.

The Xtreme-Duty® Agitator is designed specifically with protective coatings materials in mind. Able to mix common high solids coatings in 55-gallon (200 liters) drums, you will have better mixing and quality control over your high solids coatings. Special blades are designed to keep high viscosity materials in suspension.

How it works

Adjustable height, high-torque blades spin to lift material from bottom of the drum, reducing settling of material. An extra set of blades can be used for additional mixing capability.
