

Architectural Profiles Manufacturer Reduces Material, Labor & Maintenance Costs

CUSTOMER

Architectural Profiles Manufacturer

GRACO EQUIPMENT

ProBell

CHALLENGE

- Solvent usage was too high
- Needed better transfer efficiency
- Replacing booth filters 2x/week
- Servicing/repairing current competitive product approx. 6x/year

SOLUTION

Installed ProBell Rotary Atomizer

RESULTS

- Material savings with ProBell added up to 20 gallons of coating/day (approx. \$1,000/day)
- Reduced filter & labor costs because they only had to change filters once every 2 weeks vs. 2x/week
- Reduced maintenance because ProBell only needed to be serviced 1-2x/year vs 6x/year.
- Large reductions in solvent usage that resulted in positive implications for VOCs and OSHA requirements
