## **Instructions - Parts List**

# High Pressure Mastic Hose 307358R

### With Rubber Tube, Static Ground

### **Important Safety Instructions**

Read all warnings and instructions in this manual. Save these instructions.

3100 psi (21.4 MPa, 214 bar) Maximum Working Pressure

Hose No.	ID	Coupling Thread & Type	Inner Tube Material	Length
218689	3/4 in.	3/4 npt(mbe)	Buna-N	50 ft (15.2 m)
218986	1 in.	1 npt(mbe)	Buna-N	50 ft (15.2 m)

5000 psi (34.5 MPa, 345 bar) Maximum Working Pressure

Hose No.	ID	Coupling Thread & Type	Inner Tube Material	Length
215445	1/2 in.	1/2 npt(mbe)	Buna-N	5 ft (1.5 m)
215441	1/2 in.	1/2 npt(mbe)	Buna-N	10 ft (3.1 m)
215442	1/2 in.	1/2 npt(mbe)	Buna-N	15 ft (4.5 m)
215443	1/2 in.	1/2 npt(mbe)	Buna-N	25 ft (7.6 m)
215444	1/2 in.	1/2 npt(mbe)	Buna-N	50 ft (15.2 m)
215241	3/4 in.	3/4 npt(mbe)	Neoprene	6 ft (1.8 m)
215238	3/4 in.	3/4 npt(mbe)	Neoprene	10 ft (3.1 m)
215239	3/4 in.	3/4 npt(mbe)	Neoprene	15 ft (4.6 m)
215240	3/4 in.	3/4 npt(mbe)	Neoprene	25 ft (7.6 m)
273236	3/4 in.	3/4 npt(mbe)	Neoprene	12 ft. (3.7 m)
287887 287888 287889 287890	1 in. 1 in. 1 in. 1 in.	1 npt(mbe) 1 npt(mbe) 1 npt(mbe) 1 npt(mbe)	Synthetic Rubber Synthetic Rubber Synthetic Rubber Synthetic Rubber	15 ft (4.6 m) 20 ft (6.2 m)

## **Symbols**

#### **Warning Symbol**

### **A** WARNING

This symbol alerts you to the possibility of serious injury or death if you do not follow the instructions.

#### **Caution Symbol**

### **A** CAUTION

This symbol alerts you to the possibility of damage to or destruction of equipment if you do not follow the instructions.

## **WARNING**

#### **EQUIPMENT MISUSE HAZARD**

Equipment misuse can cause the equipment to rupture or malfunction and result in serious injury.

- This equipment is for professional use only.
- Read all instruction manuals, tags, and labels before operating the equipment.
- Use the equipment only for its intended purpose. If you are not sure, call your Graco distributor.
- Do not alter or modify this equipment.
- Check equipment daily. Repair or replace worn or damaged parts immediately.
- Do not exceed the maximum working pressure stated on the equipment or in the **Technical Data**for your equipment. Do not exceed the maximum working pressure of the lowest rated component
  in your system.
- Use fluids and solvents which are compatible with the equipment wetted parts. Refer to the **Technical Data** section of all equipment manuals. Read the fluid and solvent manufacturer's warnings.
- Handle hoses carefully. Do not pull on hoses to move equipment.
- Route hoses away from traffic areas, sharp edges, moving parts, and hot surfaces. Do not expose
  Graco hoses to temperatures above 66°C (150°F) or below -40°C (-40°F).
- Do not move or lift pressurized equipment.
- Comply with all applicable local, state, and national fire, electrical, and safety regulations.

#### **SKIN INJECTION HAZARD**

Spray from the gun, leaks or ruptured components can inject fluid into your body and cause extremely serious injury, including the need for amputation. Fluid splashed in the eyes or on the skin can also cause serious injury.

- Fluid injected into the skin is a serious injury. The injury may look like just a cut, but it is a serious injury. **Get immediate surgical treatment.**
- Do not stop or deflect leaks with your hand, body, glove or rag.
- Follow the Pressure Relief Procedure for your equipment if the spray tip clogs and before cleaning, checking or servicing the equipment.
- Tighten all fluid connections before operating the equipment.
- Check the hoses, tubes, and couplings daily. Replace worn, damaged, or loose parts immediately.
   Permanently coupled hoses cannot be repaired; replace the entire hose.

### WARNING

### FIRE AND EXPLOSION HAZARD

Improper grounding, poor ventilation, open flames or sparks can cause a hazardous condition and result in a fire or explosion and serious injury.

- Ground the equipment and the object being sprayed. Refer to the **Grounding** procedure for your equipment.
- If there is any static sparking or you feel an electric shock while using this equipment, **stop spraying immediately.** Do not use the equipment until you identify and correct the problem.
- Provide fresh air ventilation to avoid the buildup of flammable fumes from solvents or the fluid being sprayed.
- Keep the spray area free of debris, including solvent, rags, and gasoline.
- Do not smoke in the spray area.
- Do not turn on or off any light switch in the spray area while spraying or while operating if fumes are present.
- Do not operate a gasoline engine in the spray area.

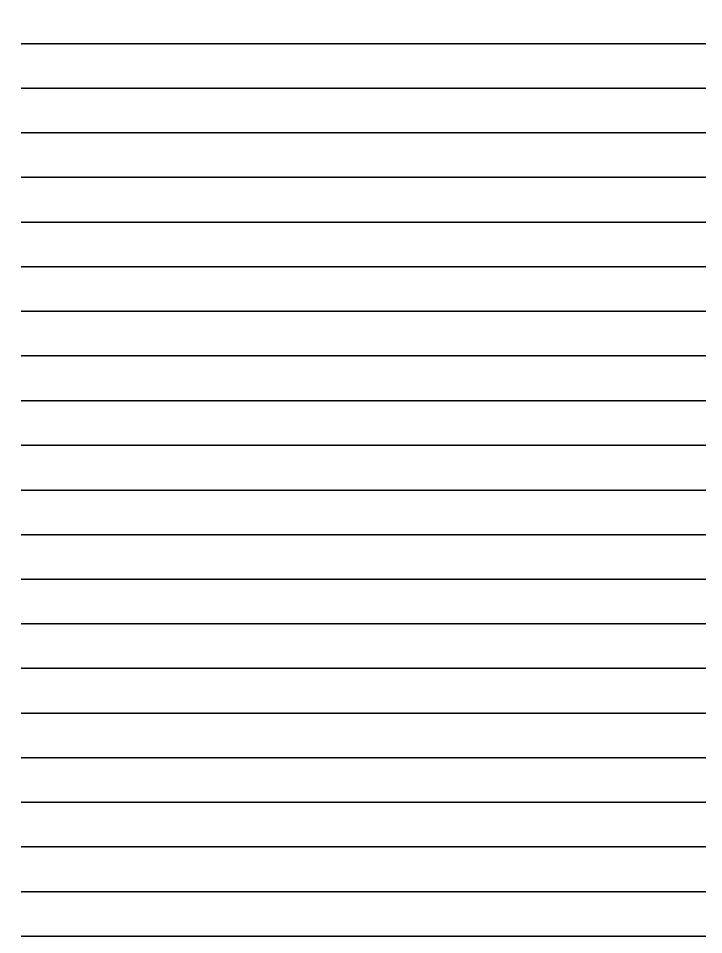

#### TOXIC FLUID HAZARD

Hazardous fluid or toxic fumes can cause serious injury or death if splashed in the eyes or on the skin, inhaled, or swallowed.

- Know the specific hazards of the fluid you are using.
- Store hazardous fluid in an approved container. Dispose of hazardous fluid according to all local, state and national guidelines.
- Always wear protective eyewear, gloves, clothing and respirator as recommended by the fluid and solvent manufacturer.

# **Notes**

#### **KEY to Chemical Resistance Tables, pages 6-11.**

- "1" **Excellent Resistance:** This fluid is expected to have minor or no effect on the polymer.
- **"2"** Good Resistance: This polymer should give reasonably satisfactory service. Due to the nature of this chemical an under prolonged exposure, the rubber may exhibit minor to moderate deterioration and/or solution discoloration. Environmental changes such as temperature, concentration, etc., may promote increased degradation.
- "X" Not Recommended: This polymer is unsatisfactory for this chemical and should not be used.
- "-" (Dash): Insufficient or no data is available for this material. Testing is advised.

**Note 1:** The above ratings as applied to the Chemical Resistance Tables are intended as guides only. They are compiled from the best data available to us. Ratings shown in the tables are based on a temperature of 70° F and 100% concentrated or saturated solutions unless otherwise noted.

**Note 2:** If unusual conditions exist, a polymer test in the fluid is suggested.

**Note 3:** Where a chemical listed in the Resistance Tables is soluble in a solvent other than water, the solvent should also be checked for its suitability with the polymer.

**Note 4:** Discoloration of fluids conveyed in hose. There are no generally accepted standard tests for measuring or rating discoloration of fluids passing through a hose. The amount of discoloration that can be tolerated is usually established by the user on the basis of application. Obviously, products such as paint must be conveyed through a hose having very good non-discoloring characteristics. If the product is not visually affected, then the hose is satisfactory. For some products, the discoloration may not be objectionable from a visual standpoint. However, the amount and makeup of the particles causing discoloration may be objectionable if they effect the final use of the product.

Some of the more common methods of checking discoloration are:

- Allowing the fluid to remain in a sample piece of hose for a given period, and then inspecting visually for discoloration.
- 2. Testing fluid as in No. 1 above and then passing it through filter paper to check for foreign content.
- A more refined test can be made with a spectrometer. This instrument measures light transmission through the fluid before and after immersion tests with rubber stocks. This gives a relative reading expressed in percent, the original fluid being rated as 100%.

## **Graco Standard Warranty**

Graco warrants all equipment manufactured by Graco and bearing its name to be free from defects in material and workmanship on the date of sale to the original purchaser for use. With the exception of any special, extended, or limited warranty published by Graco, Graco will, for a period of twelve months from the date of sale, repair or replace any part of the equipment determined by Graco to be defective. This warranty applies only when the equipment is installed, operated and maintained in accordance with Graco's written recommendations.

This warranty does not cover, and Graco shall not be liable for general wear and tear, or any malfunction, damage or wear caused by faulty installation, misapplication, abrasion, corrosion, inadequate or improper maintenance, negligence, accident, tampering, or substitution of non-Graco component parts. Nor shall Graco be liable for malfunction, damage or wear caused by the incompatibility of Graco equipment with structures, accessories, equipment or materials not supplied by Graco, or the improper design, manufacture, installation, operation or maintenance of structures, accessories, equipment or materials not supplied by Graco.

This warranty is conditioned upon the prepaid return of the equipment claimed to be defective to an authorized Graco distributor for verification of the claimed defect. If the claimed defect is verified, Graco will repair or replace free of charge any defective parts. The equipment will be returned to the original purchaser transportation prepaid. If inspection of the equipment does not disclose any defect in material or workmanship, repairs will be made at a reasonable charge, which charges may include the costs of parts, labor, and transportation.

THIS WARRANTY IS EXCLUSIVE, AND IS IN LIEU OF ANY OTHER WARRANTIES, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO WARRANTY OF MERCHANTABILITY OR WARRANTY OF FITNESS FOR A PARTICULAR PURPOSE.

Graco's sole obligation and buyer's sole remedy for any breach of warranty shall be as set forth above. The buyer agrees that no other remedy (including, but not limited to, incidental or consequential damages for lost profits, lost sales, injury to person or property, or any other incidental or consequential loss) shall be available. Any action for breach of warranty must be brought within two (2) years of the date of sale.

Graco makes no warranty, and disclaims all implied warranties of merchantability and fitness for a particular purpose in connection with accessories, equipment, materials or components sold but not manufactured by Graco. These items sold, but not manufactured by Graco (such as electric motors, switches, hose, etc.), are subject to the warranty, if any, of their manufacturer. Graco will provide purchaser with reasonable assistance in making any claim for breach of these warranties.

In no event will Graco be liable for indirect, incidental, special or consequential damages resulting from Graco supplying equipment hereunder, or the furnishing, performance, or use of any products or other goods sold hereto, whether due to a breach of contract, breach of warranty, the negligence of Graco, or otherwise.

#### FOR GRACO CANADA CUSTOMERS

The parties acknowledge that they have required that the present document, as well as all documents, notices and legal proceedings entered into, given or instituted pursuant hereto or relating directly or indirectly hereto, be drawn up in English. Les parties reconnaissent avoir convenu que la rédaction du présente document sera en Anglais, ainsi que tous documents, avis et procédures judiciaires exécutés, donnés ou intentés à la suite de ou en rapport, directement ou indirectement, avec les procedures concernées.
