

## XP PRESSURETRAK KIT

Provides Ratio Assurance for XP™ Sprayers for Explosive Atmospheres

## Take Control

With PressureTrak® installed on your Graco XP Plural-Component Sprayer, you have the assurance that you're spraying on-ratio. If off-ratio conditions occur, the sprayer automatically shuts down. The kit detects off-ratio conditions including:

- Running out of material
- Pump cavitation
- Packing failures
- Leaks in valves or fittings
- Plugged filters

## PressureTrak Includes:

- PressureTrak Module with housing – displays A & B pressures while you're spraying
- Pressure transducers
- Solenoid to stop air motor
- Air motor cover

## Ordering Information

- |        |                                |
|--------|--------------------------------|
| 17G807 | PressureTrak for XP35          |
| 17G808 | PressureTrak for XP50 and XP70 |
| 17N936 | PressureTrak for XP-hf         |
| 3A3320 | Operation and parts manual     |

## On-ratio spraying means peace of mind

- Provides assurance that your XP is spraying accurately and on-ratio
- Improved efficiency means you get it done right the first time, on time
- Reduced rework saves you labor and material costs
- Improved quality control – boost your confidence in the end results
- Easily retrofits to any XP – can be installed in less than 30 minutes

## How it works

Two pressure transducers read the A and B fluid pressures in the outlet manifold and send the readings back to PressureTrak. When the differential spray pressure between A & B fluids is out of tolerance, PressureTrak shuts off the proportioner and the alarm code appears on the display.
