Material and Equipment to Support  
Dry Dock and On-Board Infrastructure

# ► Protective Coatings Material and Equipment for Dry Docks

## The Perfect Union of Material and Equipment

Sherwin-Williams marine coatings are formulated to provide uncompromising performance in the harshest and most extreme maritime environments. Pair these coatings with a top-performing Graco sprayer for quick and easy application on dry docks.

### SINGLE LEG

#### SeaGuard 5000HS Epoxy

- Complies with IMO Performance Standard for Protective Coatings SOLAS REGULATIONS II-1/3-2 and XII/6.3
- Corrosion resistant
- Outstanding adhesion
- Qualified to MIL-PRF-24647 underwater

#### SeaGuard 6000 Epoxy

- Complies with IMO Performance Standard for Protective Coatings SOLAS REGULATIONS II-1/3-2 and XII/6.3
- Self-priming
- Low temperature application
- Surface tolerant - damp surfaces
- Salt water immersion resistance

#### SeaGuard Ablative Anti-Fouling Coating

- Long Life
- Maintains an effective, bio-active surface during its entire life
- A tin-free ablative coating
- Complies with the requirements of MIL-P-24647D

#### Polysiloxane 1K

- Low VOC
- Isocyanate free
- HAPS free
- Easy to repair
- Corrosion and chemical resistant
- Long term color and gloss
- No pot life issues

#### King® Sprayers

With three motor sizes to choose from, the King can easily handle the toughest protective coatings and corrosion control applications.

### PLURAL COMPONENT

#### Fast Glad ER

- One coat protection
- Fast return to service
- Low VOC
- Low odor
- Dry to walk-on within four hours
- Greater than 70% edge build retention

#### SherPlate PW

- One or two coat protection
- Fast return to service
- Low VOC
- Low odor
- Dry to walk-on within four hours
- Greater than 70% edge build retention

#### ExpressCote 150

- Fast return to service
- High chemical and temperature resistance
- Edge retentive properties ensure that you have desired film build even over sharp edges and angles
- Engineered to withstand highly aggressive environments

#### XP70-hf

The Graco XP70-hf is designed to pump, mix and atomize high to 100% solid coatings with superior results.

#### XPs-hf

High demand projects require large spray tips or multiple guns. The XPs-hf reduces waste, speeds up cure times and improves mix ratio.

#### XM

The XM provides precise ratio control, allows users to download historical spraying data, and handles a wide range of materials.

# ► Protective Coatings Material and Equipment for On-Board Maintenance

## Material and Maintenance on the Move

To quickly protect the surfaces of your marine vessel before the corrosion and rust comes back, use one of Graco's air or electric airless sprayers – all approved for hazardous locations. Designed to keep your vessel presentable and in peak condition, Sherwin-Williams protective coating materials and Graco's equipment are part of an anticorrosive system engineered for interior or exterior marine applications while at sea.

- Salt water immersion resistance

### Merkur® X48/X72

Merkur pumps are designed to improve productivity, reduce costs, lower emissions and provide a consistent, high quality finish.

### e-Xtreme®

The e-Xtreme operates on convenient and available electric power, which rectifies inefficiencies associated with compressors.

### King® Sprayers

With three motor sizes to choose from, the King can easily handle the toughest protective coatings and corrosion control applications.

# Graco Has You Covered

Facilities Worldwide for Global Support

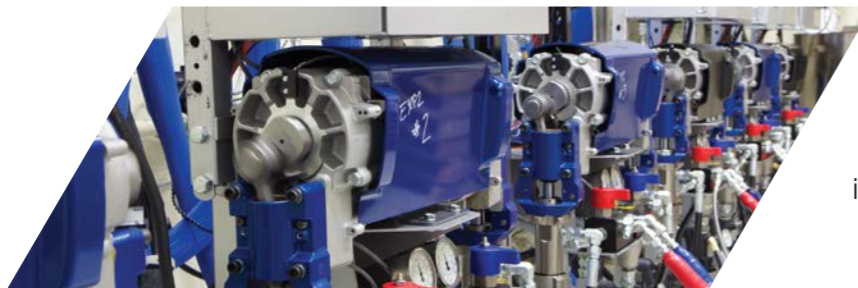

### Quality First

At Graco we pride ourselves on providing best-in-class products. Engineered solutions are manufactured in our own facilities, with the highest standards in the industry. We provide you with world-class customer support and expertise to help solve your application challenges.

### Global Reach

Graco has facilities across the globe to provide you with the products and service you need, where you live. Plus, Graco has dedicated field experts in all areas of the world to support the products we sell.

### Product Capabilities

Graco has a broad range of products that are engineered and tested to perform in the harshest environments so you can be certain your equipment is protected and working at peak performance.
