

EcoQuip® 2 EQs Dual Line
One Machine, Double the Blast Production

Large Projects Easily Handled

Multiple factors need to be considered when selecting the correct surface preparation equipment for large projects. Equipment that has a high-production rate, and the capability to complete the job quickly, allows for a marine vessel, storage tank, pipe or other asset to be put back into service quickly, once protective coatings have been applied.

Ordering Information

282950	EcoQuip 2 EQs Dual Line No Water Tank System
282952	EcoQuip 2 EQs Dual Line No Water Tank Pneumatic Hose Package
282953	EcoQuip 2 EQs Dual Line No Water Tank Electric Hose Package
282954	EcoQuip 2 EQs Dual Line No Water Tank ATEX Package
282960	EcoQuip 2 EQs Dual Line System
282962	EcoQuip 2 EQs Dual Line Pneumatic Hose Package
282963	EcoQuip 2 EQs Dual Line Electric Hose Package
282964	EcoQuip 2 EQs Dual Line ATEX Package

Switch to Graco's EcoQuip 2 Dual Line and Double Your Production

It's important to pick abrasive blast equipment that minimizes dust as well as material consumption, saving both time and money on ancillary costs such as transport, containment and even disposal costs. With EcoQuip 2 Vapor Abrasive blast equipment, your operations staff are able to complete the surface preparation portion of the contract faster, with good visibility, and also allowing other trades to complete their scope of work in the same area, while meeting or exceeding regional or state requirements.

Large, Single Control Panel

- Simple, intuitive design allows for easy control

Dual Line Control Logic (patent pending)

- Allows for consistent abrasive flow for dual blasting

High Capacity Water Pump

- Uses larger, robust Merkur air motor for performance in all conditions

Air Inlet Filter

- Prevent dirt and debris from entering air circuit

Unrestricted Fill Opening

- Allows for 2x faster loading than previous models

120 gal Water Tank

- Large enough for 1½ refills of pressure pot

12 cubic ft Pressure Pot

- Larger pot allows for long blast time with two nozzles

Durable Coated Frame

- Fully welded design for robust environments
