

Discover our Pumps for Chemical Fluids

Polypropylene and PVDF AODD Pumps

Our Husky chemical transfer air-operated double diaphragm pumps are loaded with features to help you get the job done right, every time, and are built to save you time and money.

Husky™ 15120

Husky™ 2200

KEY FEATURES - 15120 & 2200

1. One-Piece Center

- ▶ Polypropylene for chemical compatibility
- ▶ Reduced air leakage

2. External Pilots

- ▶ Provides ease of maintenance

3. Chemical Fluid Section Material Options

- ▶ Plastic models available in polypropylene or PVDF
- ▶ Metal models available in SST and Hastelloy

4. Four Bolt Joint Design

- ▶ Bolted design provides even sealing pressure for leak-free operation

5. Modular Air Valve

- ▶ Stall-free operation provides smooth and rapid changeover along with ease of maintenance

6. New Center Connection!

- ▶ Available on polypropylene pumps
- ▶ End porting available on all material options

7. Increased Flow & Efficiency

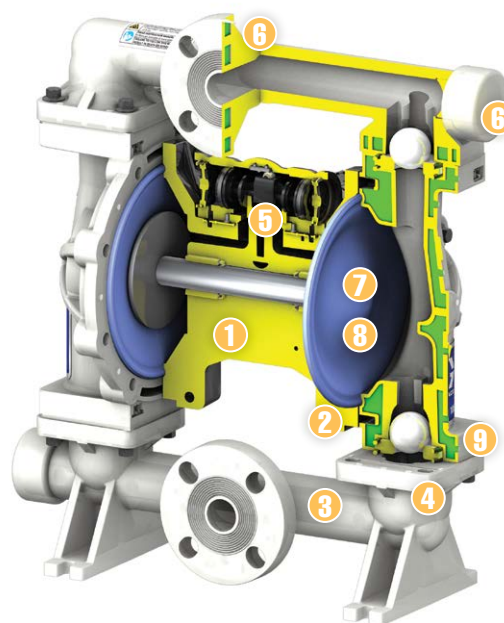

- ▶ Up to 30% more efficient
- ▶ Up to 10% more flow

8. Updated Diaphragm Design

- ▶ Improved diaphragm design for longer life
- ▶ Overmolded PTFE diaphragm option

9. Reinforced Frame

- ▶ Reduced leakage & cold flow
- ▶ Increased strength with smaller footprint
- ▶ Overmold maintains chemical resistance

Discover our Pumps for Chemical Fluids

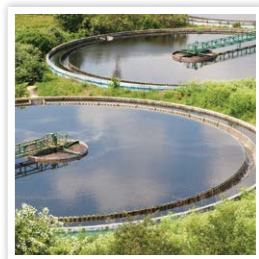

Polypropylene and PVDF AODD Pumps

WHY CHOOSE GRACO?

- ▶ Low maintenance costs
- ▶ Easy to repair
- ▶ Up to 5 times longer diaphragm life
- ▶ Designed to prevent leaking
- ▶ Up to 30 % more efficient

APPLICATIONS & MARKETS

- ▶ Transfer of chemical fluids
- ▶ Waste water
- ▶ Mining
- ▶ Semiconductor / electrical
- ▶ Paint and coatings (solvent transfer)
