

E-Flo[®] DC

Dual Control Electric Pumps

PROVEN QUALITY. LEADING TECHNOLOGY.

Single Pump. Dual Control.

Constant pressure when you want it. Constant flow when you need it. **Pressure Mode** allows you to maintain a constant fluid pressure while changing speeds to meet changing demands. This allows the circulated paint to run at slower speeds to extend the life of the paint. **Flow Mode** maintains constant paint velocity.

E-Flo DC Circulation Pumps

Graco's original 4-ball circulation pump is ideal for small to medium circulation systems. Outputs up to 2500 cc per cycle.

Unlike competitive pumps that are linked and controlled together, Graco's lowers operate independently. This allows the pump to adjust to varying pressure and flow rate demands thousands of times per second. Each pump can also run alone to keep production running if maintenance is required.

Outputs up to 5000 cc per cycle.

E-Flo DC Supply Pumps

Our 2-ball supply pump is for applications requiring high pressure, up to 3000 psi (206 bar). Plus the minimal pulsation at changeover provides a more consistent finish.

Make the Switch to Savings!

Tap into the energy savings and advanced features of Graco's electric motor. It's easier than you think to make the switch.

Save Energy

5x More Efficient

Electric motor means big savings when compared to similar-sized pneumatic motors – helping lower your energy bill and saving you money.

Outperform

Gain More Control

Advanced Control Module allows you to easily integrate the pump into a PLC network for even greater control and visibility.

Improve Quality

Dual Control (DC) technology gives you less pulsation and smooth, rapid changeovers – for better, more consistent finishes.

- A** Less than 0.09 second changeover
- B** Quick changeover and recovery with less pulsation
- C** Pressure spike at changeover
- D** Longer changeover causing pulsation

Improve Productivity

Spend Less Time Training

Electric pump functionality, with the simplicity of a pneumatic pump, makes it easy for anyone to operate.

Stay Up and Running Longer

Increased reliability means you'll spend less time maintaining and more time up and running.

Better Working Environment

Quiet electric motor means happier operators and better results. Exceeds OSHA sound regulations and **over 20 dbA's quieter** compared to similar-sized pneumatic motors.

Note: All pressures 100 psi

Boost Your Profits

Prevent Material Loss

Integrated runaway protection protects your pump from premature wear and prevents costly material loss.

Eliminate Costly Rework

Electric motor eliminates icing – giving you smoother pump operation and better finished product.

Lower Cost of Ownership

Use less energy and spend less on maintenance costs with the field-proven reliability of Graco's 2- and 4-ball pumps.

Choose Power

Select single phase 220 V or 3-phase 380-480 V Input power.

Made in the USA

Boost Your Bottom Line

with Energy Savings and Advanced Pump Control

Advanced Motor with Control Module

Efficient and smart, the E-Flo DC with Advanced Control Module gives you additional control of pump performance and allows you to manage several pumps from a single module.

Control Module

- Integrate the pump easily into a PLC Network for better visibility and control outside of the hazardous area
- Configure different operating profiles of pump
- Mount directly on pump motor or remotely on nearby wall
- Up to two pressure transducers can be added for greater control
- Connect pneumatic BPR controller to automate an "off-production" profile for even greater energy savings
- Password protect pump settings to protect against unauthorized access

Direct PLC Control

- Connect Eflo-DC directly to a PLC via 4-20 mA signal with the fiber to serial converter to allow basic automation without a local pump controller

Simple to Install

Basic installation requires only a single-phase 220 V, 50/60 Hz power or 3-phase 380 – 480 V 50/60 Hz power

No VFD's Required.

Basic Motor

Operator-friendly control knobs have clear symbols making it easy to adjust pump settings. Gives you local control at the pump and runaway protection.

Choose the Right Pump for You!

How to Select Your E-Flo DC Pump

STEP 1

Pump Selections

Refer to the **Pump Selection Table** on the next page to answer the following questions:

Lower Size – Based on desired pressure and flow rates, what size lower is required?

Circulation Pumps: 750 cc, 1000 cc, 1500 cc, 2000 cc, 2500 cc, 3000 cc, 4000 cc, or 5000 cc

Supply Pumps: 145 cc, 180 cc, 220 cc or 290 cc

Motor Size & Controls – What motor size and control type would you like on the motor? 1 or 2 hp, Basic or Advanced? What approvals are required?

Lower, Fittings and Packings – What lower material, type of fitting and packings are required on the lower?

Mount – How would you like to mount the pump? Choose either Stand Mount, Wall Mount Bracket or None.

STEP 2

Control Module & Cable

If **Basic** motor control is desired, your pump selection is complete. Refer to the Pump Selection Table on the next page for your part number.

If **Advanced** motor is desired, a Control Module and cable will be required. You can mount the controller on the pump or on a nearby wall and connect it to the pump with the appropriate CAN cable selected from the table.

High flow rate circulation pumps (2X) include the Control Module and CAN Cable. No additional equipment is required.
