

Pro Xp™ Auto

Electrostatic Spray Guns That Deliver Expert Performance

PROVEN QUALITY. LEADING TECHNOLOGY.

Choose Pro Xp

Built-in Dependability

Stay Running Longer

Durable components give you extra peace of mind knowing that you'll spend less time fixing and more time spraying.

Lower Cost of Ownership

Ease of repair and durable components reduce ownership cost.

Maximise Your Profits

Save Money

Higher transfer efficiency equals less waste – saving you money on material.

Save on Energy Costs

New air caps use less air and help lower your energy bill.

Product Versatility

More Flexibility

Versatile product line gives you more models to choose from and greater spraying flexibility with air spray, air assist and waterborne guns.

Faster Set-up

You'll be spraying parts faster with the easy modular installation. Choice of manifold style allows for system flexibility.

Stand Out Above the Rest

Excellent Finish Quality & Performance

Get the spray performance and transfer efficiency of our manual Pro Xp guns in an automatic version. They're smaller, lighter and designed to maximise your profits. Every automatic Pro Xp gun is tested and delivered with a certificate indicating it meets all of Graco's requirements for spray pattern, mechanical performance and electrical performance so you know you're getting a quality product.

Control Module

The Pro Xp Auto smart gun models connect right to the control module so you can see exactly how your gun is performing 24/7. With our control module, you can easily change the kV setting to optimize spray parameters for less touch up and a better finish quality on your parts.

System flexibility

One control module can be connected to one or two smart guns via a fibre optic cable

Eliminate maintenance guesswork

Set reminders for servicing key spray components including air cap, alternator and tip or nozzle

Displays spray performance

Know how your gun is performing with one screen that shows kV, current and alternator speed

Communicate with your system

I/O connection allows monitoring the alarm for low kV and changing profiles through a PLC or Switchbox

Adapt to your voltage needs

Select between 4 profiles to spray at the best kV for your production process

Manifolds

Manifold styles fit almost any system requirement

All hoses and fibre optic cables are connected through a manifold. Gun can be easily removed without disconnecting the hoses from the manifold. Makes gun maintenance easy!

Back manifold

Ideal for stationary and reciprocator systems.

Can also be mounted directly on a 13 mm (1/2 inch) rod.

Bottom manifold

Ideal for robot mounting

Pro Xp Auto Electrostatic Guns

Versatile product line with an 85 kV power supply and internal power so there's no electrical cord to worry about damaging or replacing. Standard gun models always run at 85 kV power and include an alternator speed indicator to display electrostatic performance. Smart gun models connect to a control module for kV control and displaying gun performance.

Air Spray Guns

Ideal for low pressure, high quality spraying. High conductivity is also available for spraying lower resistivity materials.

* Tips are tested in water.

Fluid output (Q) at other pressures (P) can be calculated by this formula: $Q = (0.041) (QT) \sqrt{P}$ where QT = fluid output (fl oz/min) at 41 bar (4.1 MPa - 600 psi) from the above table for the selected orifice size.

† These tip sizes include a 150 mesh filter.

AEF FINE FINISH PRE-ORIFICE SPRAY TIPS

ABOUT GRACO

Founded in 1926, Graco is a world leader in fluid handling systems and components. Graco products move, measure, control, dispense and apply a wide range of fluids and viscous materials used in vehicle lubrication, commercial and industrial settings.

The company's success is based on its unwavering commitment to technical excellence, world-class manufacturing and unparalleled customer service. Working closely with qualified distributors, Graco offers systems, products and technology that set the quality standard in a wide range of fluid handling solutions. Graco provides equipment for spray finishing, protective coating, paint circulation, lubrication, and dispensing sealants and adhesives, along with power application equipment for the contractor industry. Graco's ongoing investment in fluid management and control will continue to provide innovative solutions to a diverse global market.
