

## A+ Results on Paint Finish Quality for Pro Xp Guns

### CUSTOMER

Aircraft Painting Company

### GRACO EQUIPMENT

Pro Xp Air-Assist Electrostatic Spray Guns and Dura-Flo 30:1 Pumps

### CHALLENGE

This company has a reputation for some of the aerospace exterior paint industry's highest quality standards. They provide painting services to over 250 aircraft operators. So when it was time for them to open a new facility to keep up with expansion, the quality and durability of their spray package was at the top of their priority list. Painting large airplanes isn't always the easiest set up. They needed a pump that would allow them to supply six guns at once. And they needed a gun that would help them to minimize waste on the exterior of the planes.

### SOLUTION

The painting company knew that making the right equipment decisions early on would catapult their production when opening a new facility. After having a long history of success with Graco products in other locations, they decided from experience to stick with what they knew would deliver A+ results. Their Graco Spray package equipped with Pro Xp Air-Assisted Electrostatic Spray Guns and a Dura-Flo 30:1 pump was designed to deliver the highest quality, efficiency and functionality for their specifications.

### RESULTS

In the 20 months since the new plant opened and their Graco spray package was installed, they have expanded production. Purchasing a total of 23 Pro Xp85 AA guns and 3 Dura-Flo pumps. With increases in quantity they have surpassed even company standards of quality, touting a reputation for some of the best paint finishes across all of the company's locations.
