In order to eliminate system design and streamline the sales process, we have created a quick-to-spec, quick-to-quote and quick-to-sell solution. Scan the QR code or visit graco.com/offroadselector to find an automatic lubrication kit for your piece of heavy equipment.

METERING

Keep Your Equipment Running Smoothly

Graco valves and injectors are designed for a wide range of configurations, outlets and dispense volumes to lubricate multiple-sized bearings and help minimize equipment downtime. Easily dispense lubricants to multiple zones – you program where and when.

CONTROLLERS

Take Total Control by Optimizing Lubrication Intervals

Information drives uptime. The Graco GLC™ Series of controllers capture and deliver more information allowing for faster, smarter decisions. Easy to understand and easy to update, this family of automatic lubrication controllers helps increase productivity. Control your system from the palm of your hand with the GLC X Controller and Graco Auto Lube™ app.

THE PERFECT FIT FOR NON-STOP PRODUCTIVITY

The Graco automatic lubrication portfolio offers today’s modern equipment manufacturers, managers and operators the right-sized solutions for non-stop productivity and profitability. Our comprehensive, high-quality, highly responsive lineup can meet the most exacting application needs for more customers, including those new to automatic lubrication.

WELL-OILED MACHINES RUN ON GRACO

In order to eliminate system design and streamline the sales process, we have created a quick-to-spec, quick-to-quote and quick-to-sell solution. Scan the QR code or visit graco.com/offroadselector to find an automatic lubrication kit for your piece of heavy equipment.

**PUMPS**

**Lower Maintenance Costs with Frequent Lubrication**

Reduce unplanned downtime and maintenance costs with on-vehicle and heavy equipment automatic oil and grease pumps. Automatic lubrication systems provide consistent lubrication on a more frequent basis than manual techniques. Too little lubrication can create heat and wear, while too much can create drag, heat and wear, and could even damage seals. Graco grease and oil pumps deliver the right amount of lubricant at the right time.
