

PULSE® ASSET

Optimize Equipment Uptime

PROVEN QUALITY. LEADING TECHNOLOGY.

PULSE® ASSET FLUID MANAGEMENT

Designed for applications where wireless signal may not always be available, Pulse® Asset is a platform-based system that wirelessly tracks what machines are getting filled, how much fluid is used, who did the dispense and when the dispense occurred.

WHY FLUID MANAGEMENT?

ROI

Pulse Asset allows recording of every drop of fluid dispensed on the factory floor – reducing fluid usage and keeping expenses down. With Pulse Asset, you'll optimize equipment uptime and stay ahead of the competition.

Efficiency & Safety

Make reactive maintenance a thing of the past. Automated recording of dispenses reduces the chance of errors and optimizes fluid delivery practices. Identify leaking assets and reduce the risk of fluid spills before they happen.

Simplicity & Reliability

This simple system allows anybody to be trained to use – from the factory floor to the manufacturing line. The robust testing done ensures Pulse Asset exceeds quality standards, to provide many years of reliable service.

“[Pulse Asset] has allowed us to take our reactive maintenance measures and turn them into proactive maintenance measures.”

— Reliability Engineer

EASE OF OPERATION*

1 Fill assets utilizing meter that records up to 40 dispenses

2 Sync the meter to the HUB once dispenses are complete

3 Analyze dispense history on any PC, phone or tablet connected to LAN

**Please refer to the owners manual for more information.*

WIRELESS TECHNOLOGY

Built-in computer that runs custom operating system

Local Area Network (LAN) connection for flexible and private installations

Data is accessible through private log-in software on any PC, tablet or phone connected to the local area network

FLUID CONTROL

Meters record up to 40 dispenses offline, eliminating manual records

Sync to HUB when wireless connection is available to access dispense records

NFC tags control dispense activation

NFC TAGS

Asset tags at each machine prevent filling with incorrect fluids

User tags provide accountability and reduce human error

ORDERING INFORMATION

Pulse Asset Starter Kit

| PART NUMBER | DESCRIPTION |
|-------------|--|
| 2006744 | Includes one HUB, one NFC reader-writer, and one 25 pack of NFC pendants |

Components

| PART NUMBER | DESCRIPTION |
|-------------|--|
| 26D776 | 8 gpm Dispense Meter with 1/2 in NPT inlet – Rigid Extension, Oil Nozzle |
| 26D777 | 8 gpm Dispense Meter with 1/2 in NPT inlet – Rigid Extension, Coolant Nozzle |
| 26D784 | 18 gpm Dispense Meter with 3/4 in NPT inlet – Rigid Extension, High Flow Oil-Coolant Nozzle |
| 131462 | NFC pendants, blue with Graco logo – 25 pack |
| 2006845 | Adhesive NFC tags – 25 pack |
| 18G102 | Replacement NFC reader-writer – note that one is already included with Pulse Asset Starter Kit |

Oil Pump and Meter Packages

| PART NUMBER | DESCRIPTION |
|-------------|---|
| 2006857 | 16 gallon kit with 1:1 Fast-Ball 100 pump |
| 2006858 | 55 gallon with 1:1 Fast-Ball 100 pump |
| 2006859 | Universal with 1:1 Fast-Ball 100 pump |
| 2006860 | 16 gallon with 5:1 Fire-Ball 300 pump |
| 2006861 | 55 gallon with 5:1 Fire-Ball 300 pump |
| 2006862 | Universal with 5:1 Fire-Ball 300 pump |

Each kit includes a pump with bung adapter, an Asset meter with rigid extension, and a hose kit with 6 ft air hose and 6 ft oil hose. 16 and 55 gallon kits also include hand truck for oil barrel (barrel not included).

“We’ve had Pulse Asset for 4.5 months now and the system has easily paid itself back ten-fold.”
