# G5<sup>™</sup> LUBRICATION PUMPS

**Designed for Quintuplex Packing Lube** 

# **G5™ LUBRICATION PUMPS**

**Five-Point Simplicity** 

Greater profit is within reach with Graco G5 pumps. Equipped with five pump elements for more versatile and simpler grease operations, the G5 has been designed specifically for the harsh demands of fracking operations.

#### **Five Pump Elements**

• G5 comes standard with five adjustable pump elements installed.

#### **Robust Reservoir**

• U.V. resistant, high-impact reservoirs to meet the needs of your equipment.

#### **Flexible Power Options**

 Two CPC-style connectors with low level output options make for easy, hassle-free installations.

#### **Auto-Fill Shutoff Option**

 Completely fill the reservoir while avoiding costly spills with an optional AFSO.

#### **Reservoir Wiper Arm**

• Stirring paddle with wiper arm to keep material from separating.

#### **Optional Pressure Relief Valves**

• Install up to five pressure relief valves with the option to vent back into the reservoir.

#### **Two Controller Options**

 Use your existing machine's controller or choose the G5 Pro's built-in controller.

#### TYPICAL APPLICATIONS

- Quintuplex Frac Pumps
- Pumpjacks
- Other Pump-to-Point Applications

Offered either as a standalone pump or within an enclosure, the Graco G5 can be customized to meet your application standards. Enclosures are available in two sizes — the larger can house an optional auto-fill shutoff (AFSO) and pressure relief valves (PRV) whereas the smaller enclosure can house just PRVs with the pump.
