

Collect & Analyze Well Data without the hassle of being on site

Graco's Harrier®+ with Tank Level Monitoring Sensor helps you to closely monitor and control your chemical injection systems from almost anywhere. Easily monitor and control key parameters like pressures, flow rates, voltage and tank levels to ensure your chemical injection system is operating efficiently and reduce operating expenses.

Remotely Monitor & Control

Collect, monitor and analyze critical data remotely

Manage Chemicals

Adjust chemical inventory with data from tank level sensor

Reduce Downtime

Ensure chemical injection assets are operating effectively and efficiently using remote flow verification

Save Money

Reduce operating expenses by minimizing downtime, optimizing chemical usage and increasing efficiency

The tank level monitor and Harrier+ combination puts tank and chemical injection information at the user's fingertips, whether on-site or 1000 miles away. Not only can you monitor your chemical usage but you can also ensure proper pump operation and verification.

Monitor Chemicals

Real time tank monitoring ensures chemicals won't drop below predetermined levels

Verify Flow

Ensures tank levels and pump volumes match up

Improve Accuracy

Keeps chemical tank volume and chemical pump output within +/- 1%

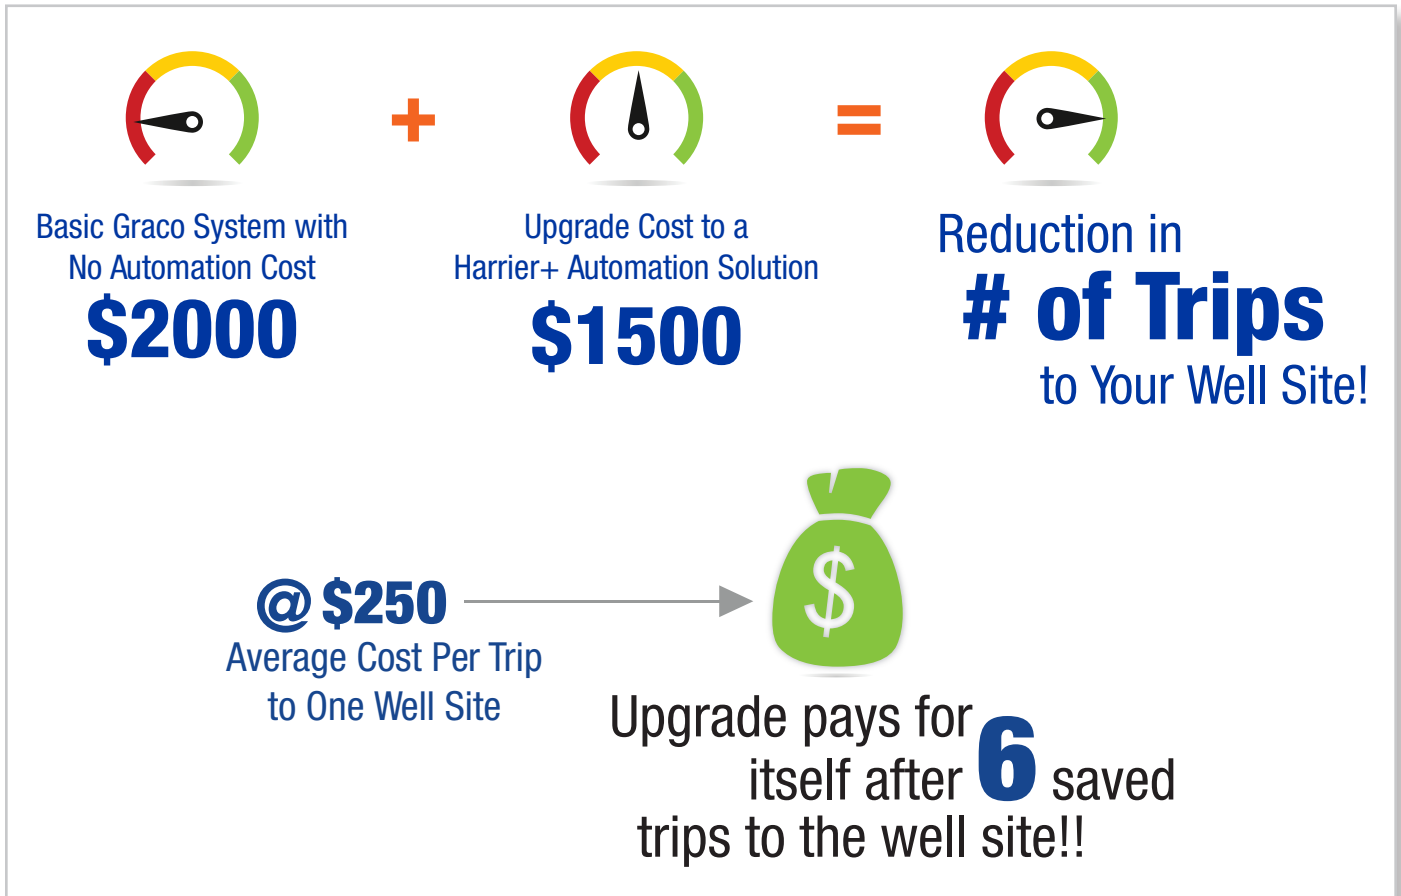

Harrier+ Chemical Injection Controller

Make the Switch to Savings

The Harrier+ can control the injection rate by timing, cycle count or flow control. The controller allows you to monitor, control and calibrate your system away from your injection site via cellular or SCADA connection. You don't have to be on site – monitor your system from your cell phone!

- Uses patent pending, adaptive injection rate controls that provide accuracy of +/- 1%
 - The controllers use sensors, with Graco software, that adjust to changes in the application like well pressure or battery voltage
- Remotely control and monitor your system with a cellular connection and web app
- Available as a standalone controller or in the power box & control panel kits
- Receive maintenance notifications and alarms
- Easily generate chemical usage reports
