Models

Part No. Matrix

Check your wall mount package's identification plate (ID) for the 6-digit part number of your package. Use the following matrix to define the construction of your package, based on the six digits. For example, Part No. 1 16 M C N represents a bare Xtreme package (1), pressure ratio (16: 1), low noise motor (M), carbon steel lower (C), and a lower with an enclosed wet cup and npt connections (N). To order replacement parts, see Parts starting on page 12.

	1	16		M		С		Ν
	First Digit	Second and Third Digit		Fourth Digit		Fifth Digit		Sixth Digit
	Pump Type	Pressure Ratio (xx:1)		NXT Motor Type	l	Lower Material	L	ower Type
1	Xtreme, bare	03	M	Low Noise, DataTrak [™]	С	Carbon Steel	N	Enclosed NPT
2	Xtreme, 5 gal. kit	04	S	Remote Exhaust, DataTrak [™]	S	Stainless Steel	В	Enclosed BSPP
3	Xtreme, 55 gal. kit	16					Т	Enclosed tri-clamp
4	Dura-Flo, bare	25					8	Sealed tri-clamp
5	Dura-Flo, 5 gal. kit	30					9	Open NPT
6	Dura-Flo, 55 gal. kit	40					0	Open tri-clamp
7	High-Flo, bare	45						
		46						

Wall Mount Packages

NOTE: All packages include integrated air controls, a wall mount bracket, attaching hardware, and ground wire.

247479	SST Fluid Filter Kit, for 3/4 in. npt(f) pump outlet		~	
247480	SST Fluid Filter Kit, for 1 in. npt(f) pump outlet			~

Warnings

The following warnings are for the setup, use, grounding, maintenance, and repair of this equipment. The exclamation point symbol alerts you to a general warning and the hazard symbols refer to procedure-specific risks. When these symbols appear in the body of this manual or on warning labels, refer back to these Warnings. Product-specific hazard symbols and warnings not covered in this section may appear throughout the body of this manual where applicable.

NARNING

FIRE AND EXPLOSION HAZARD

Flammable fumes, such as solvent and paint fumes, in work area can ignite or explode. Paint or solvent flowing through the equipment can cause static sparking. To help prevent fire and explosion:

- Use equipment only in well ventilated area.
- Eliminate all ignition sources; such as pilot lights, cigarettes, portable electric lamps, and plastic drop cloths (potential static sparking).
- Ground all equipment in the work area. See **Grounding** instructions.
- Never spray or flush solvent at high pressure.
- Keep work area free of debris, including solvent, rags and gasoline.

- Do not plug or unplug power cords, or turn power or light switches on or off when flammable fumes
- Use only grounded hoses.
- Hold gun firmly to side of grounded pail when triggering into pail. Do not use pail liners unless they are anti-static or conductive.

immediately. Do not use equipment until you identify and correct the problem. Static charge may build up on plastic parts during cleaning and could discharge and ignite flammable

vapors. To help prevent fire and explosion:

- Clean plastic parts only in a well ventilated area.
- Do not clean with a dry cloth.
- Keep a working fire extinguisher in the work area.

SKIN INJECTION HAZARD

High-pressure fluid from dispensing device, hose leaks, or ruptured components will pierce skin. This may look like just a cut, but it is a serious injury that can result in amputation. Get immediate surgical treatment.

- Engage trigger lock when not dispensing.
- Do not point dispensing device at anyone or at any part of the body.
- Do not put your hand over the fluid outlet.
- Do not stop or deflect leaks with your hand, body, glove, or rag.
- Follow the Pressure Relief Procedure when you stop dispensing and before cleaning, checking, or servicing equipment.
- Tighten all fluid connections before operating the equipment.
- Check hoses and couplings daily. Replace worn or damaged parts immediately.

WARNING

EQUIPMENT MISUSE HAZARD

Misuse can cause death or serious injury.

- Do not operate the unit when fatigued or under the influence of drugs or alcohol.
- Do not exceed the maximum working pressure or temperature rating of the lowest rated system component. See **Technical Data** in all equipment manuals.

- Turn off all equipment and follow the Pressure Relief Procedure when equipment is not in use.
- Check equipment daily. Repair or replace worn or damaged parts immediately with genuine manufacturer's replacement parts only.
- Do not alter or modify equipment. Alterations or modifications may void agency approvals and create safety hazards.
- Make sure all equipment is rated and approved for the environment in which you are using it.
- Use equipment only for its intended purpose. Call your distributor for information.
- Route hoses and cables away from traffic areas, sharp edges, moving parts, and hot surfaces.
- Do not kink or over bend hoses or use hoses to pull equipment.
- Keep children and animals away from work area.
- Comply with all applicable safety regulations.

MOVING PARTS HAZARD

Moving parts can pinch, cut or amputate fingers and other body parts.

- Keep clear of moving parts.
- Do not operate equipment with protective guards or covers removed.

TOXIC FLUID OR FUMES HAZARD

Toxic fluids or fumes can cause serious injury or death if splashed in the eyes or on skin, inhaled, or swallowed.

- Read Safety Data Sheet (SDS) to know the specific hazards of the fluids you are using.
- Store hazardous fluid in approved containers, and dispose of it according to applicable guidelines.

PERSONAL PROTECTIVE EQUIPMENT

Wear appropriate protective equipment when in the work area to help prevent serious injury, including eye injury, hearing loss, inhalation of toxic fumes, and burns. Protective equipment includes but is not limited to:

- Protective eyewear, and hearing protection.
- Respirators, protective clothing, and gloves as recommended by the fluid and solvent manufacturer.

Installation

Mount on Wall

- 1. Ensure the wall is strong enough to support the weight of the pump assembly and accessories, fluid, hoses, and stress caused during pump operation.
- 2. Ensure that the mounting location has sufficient clearance for easy operator access.
- Position the wall bracket at a convenient height, ensuring that there is sufficient clearance for the fluid suction line and for servicing the lower.
- Drill four 7/16 in. (11 mm) holes using the bracket as a template. Use any of the three mounting hole groupings in the bracket. See Mounting Hole Diagram, page 18.
- 5. Bolt the bracket securely to the wall using bolts and washers designed to hold in the wall's construction.
- 6. Attach the pump assembly to the mounting bracket.
- 7. Connect air and fluid hoses.

Grounding

The equipment must be grounded to reduce the risk of static sparking. Static sparking can cause fumes to ignite or explode. Grounding provides an escape wire for the electric current.

Pump: use ground wire and clamp (supplied). See Fig. 1. Use the ground screw (GS) and lock washer (LW) to attach the ground wire (N) at the rear of the air motor. Tighten the screw securely. Connect the other end of the ground wire to a true earth ground.

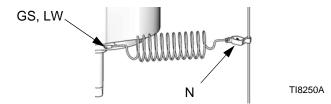

Fig. 1. Ground Wire

Air and fluid hoses: use only electrically conductive hoses.

Air compressor: follow manufacturer's recommendations.

Spray gun / Dispense valve: ground through connection to a properly grounded fluid hose and pump.

Fluid supply container: follow local code.

Object being sprayed: follow local code.

Solvent pails used when flushing: follow local code. Use only conductive metal pails, placed on a grounded surface. Do not place the pail on a nonconductive surface, such as paper or cardboard, which interrupts grounding continuity.

To maintain grounding continuity when flushing or relieving pressure: hold metal part of the spray gun/dispense valve firmly to the side of a grounded metal pail, then trigger the gun/valve.

Flush Before Using Equipment

The equipment was tested with lightweight oil, which is left in the fluid passages to protect parts. To avoid contaminating your fluid with oil, flush the equipment with a compatible solvent before using the equipment. See your respective pump manual. See **Related Manuals**, page 2.

Package Components

Integrated Air Control Module

Trapped air can cause the pump to cycle unexpectedly, which could result in serious injury from splashing or moving parts. Be sure the air bleed hole on the integrated air control module points away from the operator.

To help prevent fluid over pressurization, do not exceed the maximum air inlet pressure rating to the air motor (see page 3). If you can apply more than the maximum air input pressure to the system, install a safety relief valve between the bleed-type master air valve and the air motor. The safety relief valve must be set to open if the air inlet pressure to the motor exceeds the motor rating.

The integrated air control module (C) is included with all packages (see 311239). It includes the following:

- Bleed-type master air valve (D): required in your system to relieve air trapped between it and the air motor when the valve is closed. Be sure the valve is easily accessible from the pump and located downstream from the air regulator
- Pump air regulator (E): a locking regulator to adjust air pressure to the motor and fluid outlet pressure of pump. View the gauge (F) to read air pressure.
- Safety relief valve (G): automatically opens to relieve air pressure, to prevent pump overpressurization.
- Air line filter (H): removes harmful contaminants from entering the air control module and air motor.

Air Line Accessories

Install the following accessories in the order shown in Fig. 2, using adapters as necessary.

 Second bleed-type air valve (R): isolates air line accessories for servicing. Locate upstream from all other air line accessories. Air line moisture drain valve (S): install at the bottom of each air line drop, to drain moisture.

Fluid Line Components

Some Xtreme and Dura-Flo packages include fluid suction kits and fluid filter kits. See pages 13, 15, and 16.

- Fluid filter (J): with a 60 mesh (250 micron) stainless steel element to filter particles from the fluid as it leaves the pump.
- Fluid drain valve (K): required in your system, to relieve fluid pressure in the hose and gun.
- 55 Gal. (200 Liter) Suction kit (L): enables the pump to draw fluid from a drum. Includes bung adapter.
- 5 Gal. (19 Liter) Suction kit (M): enables the pump to draw fluid from a pail.

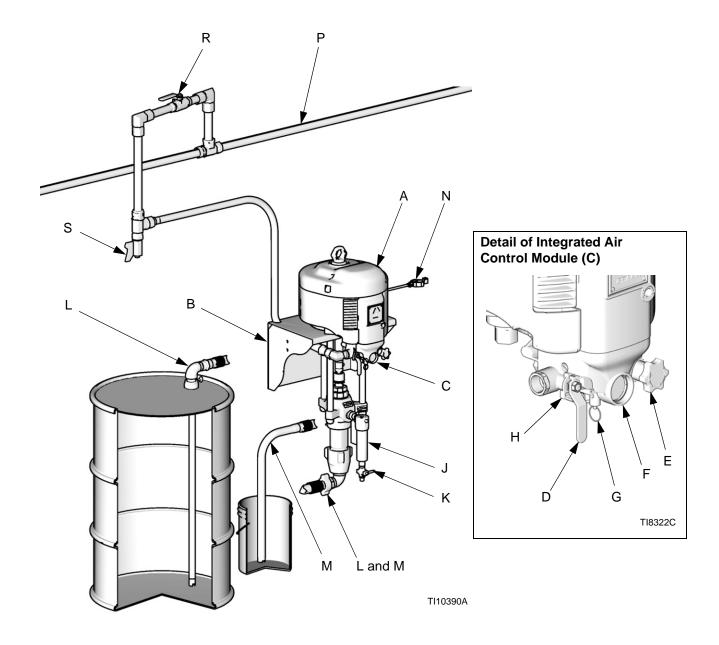

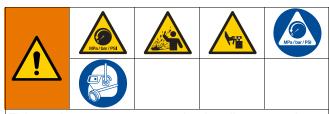

Fig. 2: Typical Installation (Xtreme Package Shown)

Key:

- A Pump
- B Wall Bracket
- C Integrated Air Control Module (includes items D-H)
- D Bleed-type Master Air Valve (required)
- E Pump Air Regulator
- F Air Pressure Gauge
- G Safety Relief Valve
- H Air Filter (hidden)
- J Fluid Filter
- K Fluid Drain Valve (required)

- 55 Gallon (200 Liter) Drum Suction Kit
- M 5 Gallon (19 Liter) Pail Suction Kit
- N Pump Ground Wire (required)
- P Main Air Supply Line
- R Air Line Shutoff Valve (bleed-type)
- S Air Line Moisture Drain Valve

Pump Operation and Repair

This equipment stays pressurized until pressure is manually relieved. To help prevent serious injury from splashing fluid and moving parts, follow the Pressure Relief Procedure when you stop spraying and before cleaning, checking, or servicing the equipment.

Follow the **Pressure Relief Procedure** in your pump manual before cleaning or repairing your equipment.

For complete instructions and warnings see your respective pump manual. See **Related Manuals**, page 2.

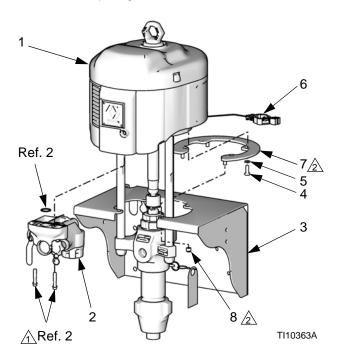

Parts

Xtreme Packages

⚠ Screws are thread-forming. Start threading by hand before using a tool. Torque to 20 ft-lb (27.1 N•m).

Not used on all packages.

Common Parts

The following parts are used on all Xtreme wall mount packages.

Ref.	Part	Description	Qty.
2	NXT011	CONTROL, air, integrated; see	1
		311239	
3	255143	BRACKET, mounting	1
		(includes 4 and 5)	
4	100101	SCREW, mounting, cap, hex head;	4
		3/8-16 x 1 in. (25 mm)	
5	100133	WASHER, lock; 3/8	4
6	244524	WIRE, ground	1

High-Flo Packages

Screws are thread-forming. Start threading by hand before using a tool. Torque to 20 ft-lb (27.1 N•m).

Common Parts

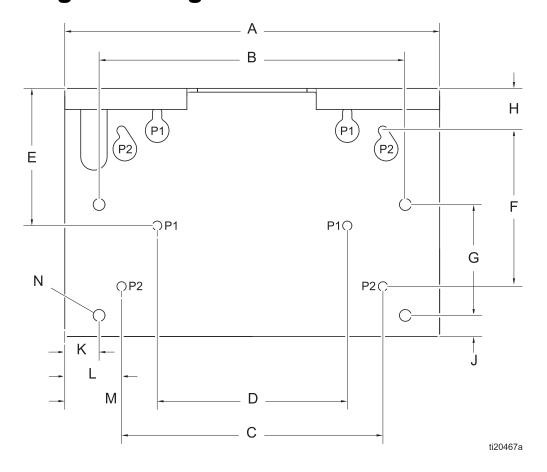

The following parts are used on all High-Flo wall mount packages.

Ref.	Part	Description	Qty.
2	NXT011	CONTROL, air, integrated; see	1
		311239	
3	255143	BRACKET, mounting	1
		(includes 4 and 5)	
4	100101	SCREW, mounting, cap, hex head;	4
		3/8-16 x 1 in. (25 mm)	
5	100133	WASHER, lock; 3/8	4
6	244524	WIRE, ground	1
7	15H060	ADAPTER, bracket	1
8	101566	NUT, lock; 3/8-16	4

Sound Data: See NXT motor manual 311238.

Wetted Parts: See Sealed 4-Ball Lower Manual 333022, or 4--Ball Lower with Open Wet Cup Manual 3A3452.

Graco Standard Warranty

Graco warrants all equipment referenced in this document which is manufactured by Graco and bearing its name to be free from defects in material and workmanship on the date of sale to the original purchaser for use. With the exception of any special, extended, or limited warranty published by Graco, Graco will, for a period of twelve months from the date of sale, repair or replace any part of the equipment determined by Graco to be defective. This warranty applies only when the equipment is installed, operated and maintained in accordance with Graco's written recommendations.

This warranty does not cover, and Graco shall not be liable for general wear and tear, or any malfunction, damage or wear caused by faulty installation, misapplication, abrasion, corrosion, inadequate or improper maintenance, negligence, accident, tampering, or substitution of non-Graco component parts. Nor shall Graco be liable for malfunction, damage or wear caused by the incompatibility of Graco equipment with structures, accessories, equipment or materials not supplied by Graco, or the improper design, manufacture, installation, operation or maintenance of structures, accessories, equipment or materials not supplied by Graco.

This warranty is conditioned upon the prepaid return of the equipment claimed to be defective to an authorized Graco distributor for verification of the claimed defect. If the claimed defect is verified, Graco will repair or replace free of charge any defective parts. The equipment will be returned to the original purchaser transportation prepaid. If inspection of the equipment does not disclose any defect in material or workmanship, repairs will be made at a reasonable charge, which charges may include the costs of parts, labor, and transportation.

THIS WARRANTY IS EXCLUSIVE, AND IS IN LIEU OF ANY OTHER WARRANTIES, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO WARRANTY OF MERCHANTABILITY OR WARRANTY OF FITNESS FOR A PARTICULAR PURPOSE.

Graco's sole obligation and buyer's sole remedy for any breach of warranty shall be as set forth above. The buyer agrees that no other remedy (including, but not limited to, incidental or consequential damages for lost profits, lost sales, injury to person or property, or any other incidental or consequential loss) shall be available. Any action for breach of warranty must be brought within two (2) years of the date of sale.

GRACO MAKES NO WARRANTY, AND DISCLAIMS ALL IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, IN CONNECTION WITH ACCESSORIES, EQUIPMENT, MATERIALS OR COMPONENTS SOLD BUT NOT MANUFACTURED BY GRACO. These items sold, but not manufactured by Graco (such as electric motors, switches, hose, etc.), are subject to the warranty, if any, of their manufacturer. Graco will provide purchaser with reasonable assistance in making any claim for breach of these warranties.

In no event will Graco be liable for indirect, incidental, special or consequential damages resulting from Graco supplying equipment hereunder, or the furnishing, performance, or use of any products or other goods sold hereto, whether due to a breach of contract, breach of warranty, the negligence of Graco, or otherwise.

FOR GRACO CANADA CUSTOMERS

The Parties acknowledge that they have required that the present document, as well as all documents, notices and legal proceedings entered into, given or instituted pursuant hereto or relating directly or indirectly hereto, be drawn up in English. Les parties reconnaissent avoir convenu que la rédaction du présente document sera en Anglais, ainsi que tous documents, avis et procédures judiciaires exécutés, donnés ou intentés, à la suite de ou en rapport, directement ou indirectement, avec les procédures concernées.
