

SaniForce® Sanitary Tote Unloader (STU)

3A5417L
EN

For use with food grade bulk supply of medium to high viscosity product. For professional use only. Only select models are approved for use in explosive atmospheres or hazardous locations. See Configuration Matrix on page 6 for more information.

Important Safety Instructions

Read all warnings and instructions in this manual and all related manuals. **Save all instructions.**

Warnings

The following warnings are for the setup, use, grounding, maintenance, and repair of this equipment. The exclamation point symbol alerts you to a general warning and the hazard symbols refer to procedure-specific risks. When these symbols appear in the body of this manual or on warning labels, refer back to these Warnings. Product-specific hazard symbols and warnings not covered in this section may appear throughout the body of this manual where applicable.

 WARNING	
 	ELECTRIC SHOCK HAZARD <p>This equipment must be grounded. Improper grounding, setup, or usage of the system can cause electric shock.</p> <ul style="list-style-type: none"> • Turn off and remove power before disconnecting any cables and before servicing or installing equipment. For cart-mounted models, unplug the power cord. For all other units, disconnect power at the main switch. • Connect only to grounded power source. • All electrical wiring must be done by a qualified electrician and comply with all local codes and regulations.
    	FIRE AND EXPLOSION HAZARD <p>Flammable fumes, such as solvent and paint fumes, in work area can ignite or explode. Paint or solvent flowing through the equipment can cause static sparking. To help prevent fire and explosion:</p> <ul style="list-style-type: none"> • Use equipment only in well ventilated area. • Eliminate all ignition sources; such as pilot lights, cigarettes, portable electric lamps, and plastic drop cloths (potential static sparking). • Ground all equipment in the work area. See Grounding instructions. • Keep work area free of debris, including solvent, rags and gasoline. • Do not plug or unplug power cords, or turn power or light switches on or off when flammable fumes are present. • Use only grounded hoses. • Stop operation immediately if static sparking occurs or you feel a shock. Do not use equipment until you identify and correct the problem. • Keep a working fire extinguisher in the work area. <p>Static charge may build up on plastic parts during cleaning and could discharge and ignite flammable vapors. To help prevent fire and explosion:</p> <ul style="list-style-type: none"> • Clean plastic parts only in well ventilated area. • Do not clean with a dry cloth.

 <h1>WARNING</h1>	
	<p>SKIN INJECTION HAZARD</p> <p>High-pressure fluid from dispensing device, hose leaks, or ruptured components will pierce skin. This may look like just a cut, but it is a serious injury that can result in amputation. Get immediate surgical treatment.</p> <ul style="list-style-type: none"> • Do not point dispensing device at anyone or at any part of the body. • Do not put your hand over the fluid outlet. • Do not stop or deflect leaks with your hand, body, glove, or rag. • Follow the Pressure Relief Procedure when you stop spraying/dispensing and before cleaning, checking, or servicing equipment. • Tighten all fluid connections before operating the equipment. • Check hoses and couplings daily. Replace worn or damaged parts immediately.
	<p>MOVING PARTS HAZARD</p> <p>Moving parts can pinch or amputate fingers and other body parts.</p> <ul style="list-style-type: none"> • Keep clear of moving parts. • Do not operate equipment with protective guards or covers removed. • Pressurized equipment can start without warning. Before checking, moving, or servicing equipment, follow the Pressure Relief Procedure and disconnect all power sources.

WARNING

EQUIPMENT MISUSE HAZARD

Misuse can cause death or serious injury.

- Do not operate the unit when fatigued or under the influence of drugs or alcohol.
- Do not exceed the maximum working pressure or temperature rating of the lowest rated system component. See **Technical Data** in all equipment manuals.
- Use fluids and solvents that are compatible with equipment wetted parts. See **Technical Data** in all equipment manuals. Read fluid and solvent manufacturer's warnings. For complete information about your material, request Safety Data Sheet (SDS) from distributor or retailer.
- Turn off all equipment and follow the **Pressure Relief Procedure** when equipment is not in use.
- Check equipment daily. Repair or replace worn or damaged parts immediately with genuine manufacturer's replacement parts only.
- Do not alter or modify equipment. Alterations or modifications may void agency approvals and create safety hazards.
- Make sure all equipment is rated and approved for the environment in which you are using it.
- Use equipment only for its intended purpose. Call your distributor for information.
- Route hoses and cables away from traffic areas, sharp edges, moving parts, and hot surfaces.
- Do not kink or over bend hoses or use hoses to pull equipment.
- Keep children and animals away from work area.
- Comply with all applicable safety regulations.

TOXIC FLUID OR FUMES HAZARD

Toxic fluids or fumes can cause serious injury or death if splashed in the eyes or on skin, inhaled, or swallowed.

- Read Safety Data Sheets (SDSs) to know the specific hazards of the fluids you are using.
- Store hazardous fluid in approved containers, and dispose of it according to applicable guidelines.

PERSONAL PROTECTIVE EQUIPMENT

Wear appropriate protective equipment when in the work area to help prevent serious injury, including eye injury, hearing loss, inhalation of toxic fumes, and burns. Protective equipment includes but is not limited to:

- Protective eyewear, and hearing protection.
- Respirators, protective clothing, and gloves as recommended by the fluid and solvent manufacturer.

Configuration Matrix

Check the identification plate (ID) for the Configuration Number of your system. Use the following matrix to define the components of your system.

Sample Configuration Number: **STU A01AAA1AA1C21**

STU	A	01	A	A	A	1	AA	0	C21
Sanitary Tote Unloader	Frame	Pump	Plate Size (Bin Type)	Seal Type	Seal Material	Controls	Accessories	Wash Kit	Certification

NOTE: Some combinations are not possible. Please check with your local supplier.

Sanitary Tote Unloader	Frame		Pump		Plate Size (Bin Type)		Seal Type		
STU	A	Stainless Steel, Footed	01	5:1 Double Ball 2 pumps	A	44.375 x 40.375 (plywood)	A	Inflatable	
	B	Stainless Steel, Extended Legs	02	5:1 Priming Piston 2 pumps	B	43.9 x 39.9 (Buckhorn 315) (Schoeller 315)	0	None	
			03	12:1 Priming Piston, 2 pumps	C	55.5 x 42 (Goodpack)			
			04	5:1 Double Ball, 4 pumps	D	43.375 x 35.625 (TNT)

0	None								

* Not ATEX. Not intended for use in explosive or hazardous environments.

Approvals

All models are rated:

and are FDA-compliant.

ATEX models with piston pumps are rated:

II 2 GD
Ex h IIA T4 Gb X
Ex h IIIB T100°C Db X

ATEX models with diaphragm pumps are rated:

II 2 GD
Ex h IIA 82°C...160°C Gb X
Ex h IIIB T135°C Db

Electro-pneumatic control panel component approval:

Intertek
9902741 Conforms to UL STD 508A
Certified to CSA STD C22.2 No. 14

Troubleshooting

1. Follow the Pressure Relief Procedure in the operation manual before servicing the equipment.
2. Check all possible problems and causes before disassembling the system.

Problem	Cause	Solution
Ram plate will not rise.	Ram Up air pressure set too low.	Increase Ram Up air pressure.
	Ram stuck in tote.	Deflate seal. Check that seal pressure gauge on front of control panel reads zero.
	Ram plate stuck to bottom of tote.	Press air assist button while raising plate.
Ram plate will not lower.	Cylinder lock activated.	Raise plate to top. Pull lock lever all the way out. Lower cylinder.
	Ram Down air pressure set too low.	Increase Ram Down air pressure.
	Pumps are not evacuating product.	Troubleshoot pump.
	Inflatable seal pressure set too high.	Decrease inflatable seal air pressure.
Pumps will not cycle.	Air pressure to pumps is too low.	Increase pump air pressure.
	Outlet fluid flow blocked.	Unblock pump outlet.
Pump cycles but will not prime.	Pump is running too fast to prime.	Pumps prime better at slower speeds. Slow down pump by adjusting pump speed slow flow control valve.
Pump cycle uneven, diving on downstroke.	Pump cavitating on upstroke.	Liner blocking inlet. Raise plate and unblock inlet.
		Product too thick to flow into pump inlet fast. Slow down pump speed.
		Tote out of product.
Pump cycle uneven, diving on upstroke.	Pump check damaged.	Service pump.
Inflatable seal getting pinched between plate and tote wall.	Ram pressure set too high.	Decrease ram air pressure.
	Seal pressure set too low.	Increase seal air pressure.
Seal coming off ram plate when plate is rising.	Seal not retracting all the way before raising ram plate.	Increase venturi flow.
Product leaking past seal.	Ram Down pressure set too high.	Decrease Ram Down air pressure.
	Seal pressure set too low.	Increase seal air pressure.
	Corner seals not in place.	Install corner seals.
Plate raises or lowers too quickly.	Up or Down flow control valve too far open.	Adjust flow control valve(s).
Control levers/buttons do not actuate valves.	Not enough air pressure supplied to controls.	Increase control supply air pressure.

ti37970a

Wash Bin Config Code	Part	Title	Description	Refer to manual:
0	— — —	— — —	— — —	— — —
1	25N650	Wash Bin	Polypropylene wash bin mounted on an aluminum pallet. Uses a 2.125 outside-diameter polypropylene cam-and-groove fitting for drainage (included).	— — —

Technical Data

SaniForce STU		
	US	Metric
Maximum working fluid pressure	See pump manual	
Compressed air requirement	60–100 psi	0.41–0.7 MPa, 4.1–7 bar
Pressure ratio	See pump manual	
Air consumption	See pump manual. Multiply by number of pumps	
Flow rate @ 60 cpm	See pump manual. Multiply by number of pumps	
Fluid displacement	See pump manual. Multiply by number of pumps	
Pump Outlet (See pump manual for pump outlet information)		
Wetted Parts (See pump manual for pump wetted parts)		
300 series stainless steel, buna-n, and polychloroprene or EPDM on the ram plate and seals. <i>See your pump manual for additional wetted parts.</i>		
Control panel		
Enclosure type	4X	
Maximum input air pressure	100 psi	0.7 MPa, 7 bar
Maximum up/down ram pressure	100 psi	0.7 MPa, 7 bar
Maximum seal pressure	18 psi	0.1 MPa, 1.2 bar
Air inlet – air controls	1/2 in npt(f)	
Air inlet – pump	3/4 in npt(f)	
Electrical specifications for electro–pneumatic control panel		
Supply voltage	100–240 VAC	
Phase	1	
Frequency	50/60 Hz	
Maximum current	1.3 A	
No electrical disconnect switch or branch circuit protection provided on the panel.		
Sound data <i>See your pump manual.</i>		

Fluid Temperature Range

NOTICE

Temperature limits are based on mechanical stress only. Certain chemicals will further limit the fluid temperature range. Stay within the temperature range of the most-restricted wetted component. Operating at a fluid temperature that is too high or too low for the components of your pump may cause equipment damage.

Diaphragm/Ball/Seat Material	Stainless Steel Pump Fluid Temperature Range	
	Fahrenheit	Celsius
FKM Fluoroelastomer (FK)	-40° to 275°F	-40° to 135°C
Polychloroprene check balls (CW)	0° to 180°F	-18° to 82°C
PTFE overmolded diaphragm (PO)	40° to 180°F	4° to 82°C
PTFE check balls (PT) or two-piece PTFE/Santoprene diaphragm (PS)	40° to 220°F	4° to 104°C
Santoprene (SP)	-40° to 180°F	-40° to 82°C

* The maximum temperature listed is based on the ATEX standard for T4 temperature classification.

Graco Standard Warranty

Graco warrants all equipment referenced in this document which is manufactured by Graco and bearing its name to be free from defects in material and workmanship on the date of sale to the original purchaser for use. With the exception of any special, extended, or limited warranty published by Graco, Graco will, for a period of twelve months from the date of sale, repair or replace any part of the equipment determined by Graco to be defective. This warranty applies only when the equipment is installed, operated and maintained in accordance with Graco's written recommendations.

This warranty does not cover, and Graco shall not be liable for general wear and tear, or any malfunction, damage or wear caused by faulty installation, misapplication, abrasion, corrosion, inadequate or improper maintenance, negligence, accident, tampering, or substitution of non-Graco component parts. Nor shall Graco be liable for malfunction, damage or wear caused by the incompatibility of Graco equipment with structures, accessories, equipment or materials not supplied by Graco, or the improper design, manufacture, installation, operation or maintenance of structures, accessories, equipment or materials not supplied by Graco.

This warranty is conditioned upon the prepaid return of the equipment claimed to be defective to an authorized Graco distributor for verification of the claimed defect. If the claimed defect is verified, Graco will repair or replace free of charge any defective parts. The equipment will be returned to the original purchaser transportation prepaid. If inspection of the equipment does not disclose any defect in material or workmanship, repairs will be made at a reasonable charge, which charges may include the costs of parts, labor, and transportation.

THIS WARRANTY IS EXCLUSIVE, AND IS IN LIEU OF ANY OTHER WARRANTIES, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO WARRANTY OF MERCHANTABILITY OR WARRANTY OF FITNESS FOR A PARTICULAR PURPOSE.

Graco's sole obligation and buyer's sole remedy for any breach of warranty shall be as set forth above. The buyer agrees that no other remedy (including, but not limited to, incidental or consequential damages for lost profits, lost sales, injury to person or property, or any other incidental or consequential loss) shall be available. Any action for breach of warranty must be brought within two (2) years of the date of sale.

GRACO MAKES NO WARRANTY, AND DISCLAIMS ALL IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, IN CONNECTION WITH ACCESSORIES, EQUIPMENT, MATERIALS OR COMPONENTS SOLD BUT NOT MANUFACTURED BY GRACO. These items sold, but not manufactured by Graco (such as electric motors, switches, hose, etc.), are subject to the warranty, if any, of their manufacturer. Graco will provide purchaser with reasonable assistance in making any claim for breach of these warranties.

In no event will Graco be liable for indirect, incidental, special or consequential damages resulting from Graco supplying equipment hereunder, or the furnishing, performance, or use of any products or other goods sold hereto, whether due to a breach of contract, breach of warranty, the negligence of Graco, or otherwise.

FOR GRACO CANADA CUSTOMERS

The Parties acknowledge that they have required that the present document, as well as all documents, notices and legal proceedings entered into, given or instituted pursuant hereto or relating directly or indirectly hereto, be drawn up in English. Les parties reconnaissent avoir convenu que la rédaction du présente document sera en Anglais, ainsi que tous documents, avis et procédures judiciaires exécutés, donnés ou intentés, à la suite de ou en rapport, directement ou indirectement, avec les procédures concernées.
